SOAR

THREAT INTELLIGENCE

WHAT YOU GET

- ✓ Continuous monitoring
- ✓ Faster threat detection
- ✓ Expert incident response
- ✓ Executive reporting

WHY CHOOSE US

- ✓ Experienced SOC analysts
- ✓ Proven detection methodology
- ✓ Flexible engagement model
- ✓ Security that scales with your business

DETECT.

RESPOND.

RECOVER.

STRENGTHEN.

Stronger Today. Safer Tomorrow.

MANAGED AI SECURITY SERVICES

Secure AI. Protect Data. Govern with Confidence.

AI is already in your organization.

Through AI assistants, copilots, productivity tools, developer platforms, and business applications.

The question is:

Do you know where it's being used and what data is being shared?

OUR MANAGED AI SECURITY SERVICES

1 DISCOVER

Understand Your AI Landscape

- AI applications
- Shadow AI
- AI agents
- Browser extensions
- AI integrations

2 MONITOR

Know How AI Is Being Used

- User activity
- AI interactions
- Data shared with AI
- Usage trends
- Continuous monitoring

3 PROTECT

Identify & Reduce AI Risks

- AI misconfigurations
- Risky integrations
- Data leakage
- Excessive permissions
- Policy violations

4 DEFEND

Stop AI Threats

- Prompt injection
- Unauthorized AI usage
- Malicious AI extensions
- Account compromise
- AI abuse detection

5 GOVERN

Strengthen Compliance

- AI policies
- Governance
- Audit reporting
- Executive dashboards
- Compliance readiness

WHAT YOU GET

Complete AI Visibility

Continuous Risk Monitoring

Executive Dashboards

Actionable Remediation

Compliance Reporting

AI Security Advisory

Secure AI Before It Becomes Your Next Security Risk.

DETECT

MONITOR

PROTECT

GOVERN

Protect Sensitive Data
Prevent data leakage and unauthorized sharing.

Ensure Compliance
Meet regulatory requirements and industry standards.

Enable Innovation
Adopt AI securely and drive business forward.

Build Trust
Strengthen customer confidence with responsible AI.

APPLICATION SECURITY SERVICES

CONTINUOUSLY SECURING YOUR APPLICATIONS. EVERY RELEASE. EVERY TIME.

We help organizations build secure applications and stay ahead of evolving threats with continuous scans, comprehensive testing, expert analysis, and actionable remediation—throughout the application lifecycle.

& IMPROVE

SCANS & TESTS WE DELIVER

SAST

(Static Application
Security Testing)

Find vulnerabilities
early in the SDLC.

DAST

(Dynamic Application
Security Testing)

Identify vulnerabilities
in running
applications.

API SECURITY TESTING

Detect API flaws
and business
logic abuse.

SCA

(Software Composition
Analysis)

Secure open source
and third-party
components.

CLOUD SECURITY TESTING

Identify misconfigurations
and risks in your
cloud resources.

MOBILE APPLICATION TESTING

Ensure your mobile
apps are resilient
and secure.

PENETRATION TESTING

Simulate real-world
attacks to uncover
exploitable
weaknesses.

AUTOMATED +
